**NEBB2G1**

Valid till  
**31st Dec.  
2020**

## Q5 High Fidelity DNA Polymerase

**Fidelity** – the highest fidelity amplification available (~280X higher than Taq and > 5X higher than Phusion)

**Robustness** – high specificity and yield with minimal optimization

**Coverage** – superior performance for a broad range of amplicons (from high AT to high GC)

**Speed** – short extension times

**Amplicon Length** – robust amplifications up to 20 kb for simple template, and 10 kb for complex

**# M0491S (100U) & # M0491L (500U)**

## Phusion® High-Fidelity DNA Polymerase

- 50X higher fidelity than Taq
- Robust reactions - maximal success with minimal optimization
- Offered with multiple buffers for customized reaction setup for different DNA templates

**# M0530S (100U) & # M0530L (500U)**

### TERMS & CONDITIONS

- Applicable for New Price List (FY 2020-2021) only.
- Offers are inclusive of RC discount hence NO RC discount will be applicable.
- OLD RC Price is not applicable under offer.
- Valid till 31st Dec. 2020.
- Applicable for North and East region only.
